

AquaSParkle

PhosAway

Key Features

- Dual-action phosphate remover & clarifier
- Rapidly reduces elevated phosphate levels
- Clears cloudy water

AquaSParkle PhosAway is a fast-acting phosphate remover and clarifier, which rapidly lowers elevated phosphate levels in hot tub water.

Application Instructions

- 1) Ensure the hot tub water is properly balanced.
- 2) Test the phosphate level using phosphate test strips to maintain target level between 150 – 300ppb.
- 3) Shake the bottle well before use.
- 4) Apply PhosAway directly to your hot tub water with the pump(s) running to aid distribution.

Litres	Gallons	Dose rate to lower phosphate level:		
		<1,000ppb	1 – 2,000ppb	>2,000ppb
1,000	220	30ml	60ml	120ml
1,500	330	45ml	90ml	180ml

Ppb = parts per billion

- 5) Keep the filtration running for a minimum of four hours after application.
- 6) Clean your hot tub cartridge filter(s) 24 hours after treatment.
- 7) Re-test the phosphate level and add an additional smaller dose as required.

Note: The hot tub water may become temporarily cloudy after product application.
